

MICHAEL CAI

4A Electrical Engineer

michaelcai.me | ykcai@edu.uwaterloo.ca | +1 (647)-529-7012

SKILLS

- Languages: **JavaScript**, **Python**, **HTML**, **CSS**, **SQL**, **Golang**, **C/C++**, **Java**
- Tools & Frameworks: **React/React-Native**, **NodeJS**, **IBM Bluemix**, **Google Cloud Platform**, **Git**, **Tensorflow**

EXPERIENCE

SOFTWARE CONSULTANT INTERN | IBM CANADA LTD

Jan - May, Sept - Dec 2017 | Toronto, ON

- Led small team to develop an employee rewards application integrated with **IBM Blockchain**, first real demonstration utilizing blockchain at IBM Canada
- Created a **RESTful API** using **JavaScript** for integration with **Hyperledger Fabric** and **Hyperledger Composer**
- Reduced application production time by **70%** by using **React Native**, leading to fast prototyping and simple structure
- Hosted presentations and meeting to help clients and senior executives make informed decision regarding blockchain
- Architected end-to-end communications flow between **NodeJS** client backend, **Slack**, **Bluemix Services** and the mobile application

AGILE SOFTWARE ENGINEERING INTERN | PIVOTAL LABS

May - Aug 2016 | Toronto, ON

- Developed the **Lincoln/Ford** Android app and boosted downloads by **30%** and achieved a **4-star** rating in the Play Store
- Improved application performance by implementing reactive programming with **RxJava** and **RxAndroid**
- Designed and developed with the **Model-View-Presenter** architecture and used **Dagger** for dependency injections

AGILE AUTOMATION ENGINEERING INTERN | PIVOTAL LABS

Sept - Dec 2015 | Toronto, ON

- Developed automation tests for various **Android** applications using **Espresso** and logged with **Pivotal Tracker** and **Jira**
- Performed exploratory testing on mobile devices in an **Agile/Extreme Programming** environment

PROJECTS

TESTIFY

May 2018 - Present | Fourth Year Design Project

- A centralized service for take home coding interview challenges as part of fourth year capstone project

RIDEBUDDY

Jan 2018 - Present | Mobile Application

- Designed and developed a **Android** and **iOS** application for ride sharing targeting university carpool programs.
- Mobile application built with **React-Native** with integration to **Facebook** and **Twilio** interfaced with a **Python** server

HANDWRITTEN

April 2018 - Present | Machine Learning Project

- Designed neural networks using genetic algorithms with graph generation systems to recognize grayscale images of handwritten digits from MNIST data set
- Implemented a proof-of-concept two-layer convolutional neural network trained using the Keras Sequential model interfaced with Tensorflow

INFOEXTRACT

Jan - May 2015 | Windows Application | Hydro One Inc.

- Proposed, developed and tested a Windows application that would enable users to extract data of a specific type and perform analysis on the data collection
- Made using **C#** for PSS/E Load Flow and PSS/E Harmonic Frequency Scanner Tool

EDUCATION

SEPT 2014 - PRESENT | UNIVERSITY OF WATERLOO

- Bachelor of Applied Science in Electrical Engineering (GPA: 3.7/4.0)
- Relevant Courses: Data Structures and Algorithms, Computer and Communication Networks, Cooperative and Adaptive Algorithms, Operating Systems and Systems Programming
